NOTE. All figures relate to Australia as a whole unless otherwise stated. Annual totals in the graphs included in this Digest have been reduced to averages (monthly, quarterly or half-yearly) where necessary, to facilitate comparison with current figures. Any discrepancies between totals and sums of components in series are due to rounding. Values are shown in Australian dollars (\$) or cents (c).

SEASONALLY ADJUSTED INDICATORS

Pages 4-9 of this publication contain a series of original and seasonally adjusted statistical indicators of Australian economic activity, representative of unadjusted series presented elsewhere in the publication.

Details of the methods used in seasonally adjusting these and other series are given in Seasonally Adjusted Indicators 1967, issued by this Bureau on 18 July 1967, which contains original and seasonally adjusted data in tabular and graphical form for forty-eight selected series. The seasonally adjusted indicators included therein will be up-dated in relevant monthly and quarterly publications of this Bureau.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Digest have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc., in the month) and the influence of moveable holidays, i.e. Easter and Australia Day. The adjustments made to each series are indicated in Appendix B of Seasonally Adjusted Indicators 1967.

The "indicator" headings on pages 4-9 of the Digest show page and item numbers of the relevant series, which should be referred to for further information on the nature of the series and for further statistical detail.

The seasonally adjusted series are subject to revision.
